SERVICE FROM STRYKER

New Inclusive Package for Stryker Video Stacks

Maximising value on capital investments is a priority for every customer. You deserve a solution that fits your operating budget needs while delivering the high-quality service solution provided by an original equipment manufacturer.

Stryker South Pacific recognises this and is excited to offer a new comprehensive service plan for the Stryker Video Stack.

The new program offers a complete service solution for each component of your video stack (and one 3-chip HD Camera/Coupler) at a predictable cost that streamlines the process of procuring purchase orders for maintenance and repair.

Customers who choose this inclusive package will:

- Benefit from cost savings on the inclusive package versus single-item service contracts
- Create efficiency in procurement: all maintenance and repairs are pre-approved without additional purchase orders
- Receive priority at the Service Centre for all repairs and Loaner Equipment
- Loaner Equipment guaranteed for items on Service Contract – reduce equipment downtime!
- Enjoy predictable, fixed costs for the life of the equipment.

Take advantage of this cost saving solution.

Contact your local sales representative or ProCare Customer Care Representative at AUS: 1800 667 558 or NZ: 0508 667 558
